

Cybersecurity Scan Report: Know Where You Stand Before You Sign

See What Hackers Can See
— And What You Can Fix

Your business is constantly exposed to cyber threats — even if you haven't been breached yet. That's why IronEdge offers a proactive Cybersecurity Scan that evaluates your current risk posture, uncovers critical vulnerabilities, and provides an actionable report you can use immediately.

This isn't a generic assessment. It's a deep dive into the real-world risks facing your business — with or without IronEdge on your side.

Our Scanning Methods: Internal and External Threat Testing

Internal Simulation:

We test what could happen if one of your users clicks a phishing email — the most common point of entry for attackers.

Backup

Accounts

Microsoft 365

Patches

Antivirus

Firewall

Education

Encryption

Surveillance

External Scan:

We simulate how hackers discover internet-facing vulnerabilities and test for exploitable weaknesses — just like real cybercriminals do.

What You Get in Your Cybersecurity Scan Report

Risk Scorecard

You'll receive a high-level view of your IT environment showing:

High Risk Issues that need urgent attention.

Moderate Risks that can escalate if ignored.

Low Risks that should be monitored.

Detailed Findings and Remediation Steps

Every issue identified includes a plain-language explanation and prioritized remediation recommendations.

You'll see exactly **what attackers could access**, such as cracked passwords, reused credentials, exposed sensitive data, or misconfigured Microsoft 365 accounts.

Why This Report Matters

Your Cybersecurity Scan is more than a list of problems — it's a blueprint for action. Whether you fix issues with your internal IT team or partner with IronEdge to resolve them, the report gives you a clear path to:

Strengthen your defenses.

Reduce your cyber insurance risk.

Understand your IT environment at a strategic level.

Build a tailored cybersecurity roadmap — aligned with your budget and goals.

Ready to uncover your company's cybersecurity risks — and what to do about them?

Request your free Cybersecurity Scan today.
