

IronAI™: Secure, Smart AI Management

Take control of AI in your business — protect data, empower employees, and unlock AI-driven efficiency.

The Challenge

Uncontrolled AI usage poses serious risk for business owners

DATA LEAKAGE

Proprietary information may be used by model creators to train or improve their AI.

SECURITY EXPOSURE

Sensitive files are processed and stored on third-party servers without oversight.

LACK OF CONTROL

No visibility into what information employees share with open AI tools.

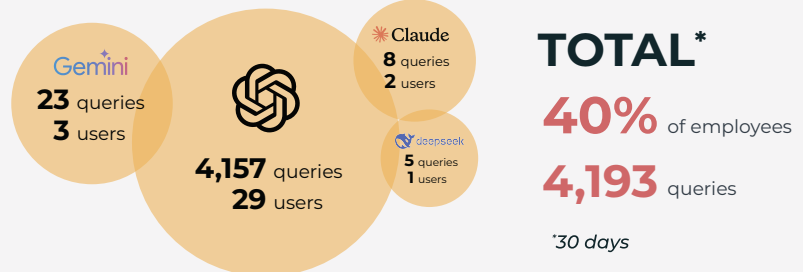

POLICY GAPS

Inconsistent and unmanaged AI usage leaves the organization vulnerable.

Hidden AI Use Is Already Happening in Your Business

Employees are already experimenting with AI to work faster. But without oversight, that convenience can quickly turn into costly exposure.

Example: When asked, a CEO believed his company had zero AI usage. A simple DNS scan told a very different story ...

Bottom line: Businesses need a way to harness AI while protecting their data, enforcing policies, and enabling employees to use AI safely.

The Solution: IronAI from IronEdge Group

IronAI Brings Control, Security, and Strategy to AI in Your Business

With IronAI, you can embrace the benefits of AI while eliminating hidden risks. We help you discover where AI is being used, implement clear policies, secure sensitive data, and build a roadmap that aligns AI adoption with your business goals.

With IronAI, you get:

A clear understanding of how AI is being used in your company today.

A secure, organizationally managed platform to access multiple AI models (LLMs).

Enterprise-grade data privacy and confidentiality.

Training, support, and consulting to safely unlock AI's full potential.

AI Assessment

Gain visibility into your company's AI readiness, risks, and opportunities.

- Technology scan + survey to uncover shadow AI usage.
- Proprietary AI Scorecard and tailored action plan.
- Identifies employee risks, security gaps, and opportunities for automation.
- Pinpoints employee skill gaps and AI training needs.

LLM Platform

A secure, managed AI platform that provides employees with safe access to multiple large language models.

- Single AI interface with enterprise-grade privacy controls.
- Access to multiple AI models.
- Pre-built AI templates for common business use cases.
- Customizable workflows for greater automation and efficiency.

AI Training Services

Help your team adopt AI safely and effectively with training and ongoing managed services.

- Policy setup and platform configuration.
- AI use case consulting and roadmap development.
- Implementation support and ongoing advisory services.

Advanced AI Adoption

Take your AI strategy to the next level with deeper integration and measurable impact.

- ~20-hour consultative engagement (interviews, diagnostics, ROI modeling).
- AI Adoption Scorecard & Roadmap for short- and long-term initiatives.
- Identify practical, high-value use cases for growth and efficiency.
- Ongoing advisory to maximize ROI and innovation.

Why IronEdge?

With IronAI, IronEdge becomes your trusted AI advisor — helping you mitigate risks, protect your data, and strategically adopt AI to drive growth.
